Technologies and Languages

- Java, JavaScript
- Git, React, mongoDB, Express, Node, React-three-fiber, React Redux, Spring boot, Tailwind css

EXPERIENCE

Software Engineer Intern | Eduplus Campus: Dec 2023 – Mar 2024

- Created a fully functional mobile app using Flutter
- Fetched the data from the database and implemented in the app
- Designed the UI and handed of well documented and easily readable code

Front-end Engineer | Vague Sync digital: ongoing

- Build a website for companies landing page
- Designed the UI and handed of well documented and easily readable code

PROJECTS

Full-stack note taking app with next.js
- Used next js with tailwind css to build the ui
- Implemented google auth using next auth.js
- Used mongoDB and express in next js for backend.

Full stack food delivery (React, Express, Node and mongoDB)
- The users can select any food item from the menu from different categories
- implemented stripe for easy payment
- User gets a real time update on their food order
- The restaurant can access the admin panel and get the requests and change the status of requests which will then show up on the client side

Html wrapper vs code extension (Typescript)
- Solved the problem of wrapping a html element into another element
- user can easily select the element they want to wrap and wrap it in their desired element
- used the vs code library

Apple website clone (React js, React three fiber)
- Built a stunning clone of the apple website using react js and three js
- Used a 3d model of iphone and showed it on the website using react-three-fiber

Prompt share (Next js, Next auth)
- A website where users can share use-full prompts with other users
- Users can login through google, Apple or github

Musify music player (React js, MongoDB , Express, NodeJs)
- A music playing app for the web where you can listen to your favourite artist
- User can easily sign-up or login into the app
- Users can upload their own music, make playlists and like song
- Users can also stream their music live to their audience

Education
Sharad Institute Of Technology
Bachelor of Science in Computer Science 2025
CGPA: 6.40
